**Objet:** [ECML-PKDD 2020] Paper discussion  
**Date:** 6 mai 2020 à 17:02  
**À:** Romain Tavenard [romain.tavenard@univ-rennes2.fr](mailto:romain.tavenard@univ-rennes2.fr)

---

Dear PC members, dear Romain,

The reviews by other PC members are now also available for you to read. Please read the other reviews for each of your papers and consider whether you would like to modify your initial review. You can also discuss the paper and pose questions or remarks to each other and to the area chair as 'comments' in the discussion section of each paper: 'Reviews' -> 'Assigned to me' and then the magnifying glass icon under 'Show reviews' for any of your papers.

Important note: to receive notifications by mail about responses, please go to 'ECML-PKDD 2020' -> 'My watchlist' and mark all papers. Otherwise you may forget and miss important parts of the discussions.

The Area Chairs (in EasyChair named Senior PC members) will take part in these discussions and ask questions as well, please respond to these as quickly as feasible, such that the discussion can be concluded as quickly as possible.

After the discussions, for each paper the corresponding Area Chair will make a recommendation to us and then we will decide which papers will be accepted and presented at the conference in September.

Please help us make sure every paper is assessed as well as possible. Thank you very much for your efforts!

The Research Track Program Chairs,

Frank Hutter (University of Freiburg)  
Isabel Valera (Saarland University & MPI for Intelligent Systems)  
Jefrey Lijffijt (Ghent University)  
Kristian Kersting (TU Darmstadt University)
